# The source of energy: evaporation - condensation

Posted by Kutin - 2007/11/26 20:11

---

How do you do ?

This work of mine is an attempt to consider as an alternative source of energy the evaporation - condensation process of the non-uniformed gases. Please look at H2.zip file, or at

<http://www.energy2000.narod.ru/H2/H2.zip>

Thank you for attention.

Global warming!

With kind respect, Emil Kutin.
